

black areas, as you can see in these pictures. Edge detection could have been better too.

But if we talk about low-light photography, this phone impressed me a lot. Some of these shots I have taken in complete darkness and as you can see how decently it has managed the image processing. Moreover, the light management also seems decent. So cut short, low-light photography on the T4x 5G is highly convincing for a budget phone.

Now if we flip the phone to the front camera, the 8-megapixel selfie shooter also does the job. It captures sharp pictures and the colours are also nice.

There is no ultrawide lens, but again don't forget it's a sub-Rs 15,000 phone, so we can't really complain here.

BATTERY

This is a performance-packed phone, not only because of its processor stability but also because of the battery backup it offers. The Vivo T4x 5G is equipped with a massive 6500mAh battery that supports 44W fast charging. And one thing I can tell you, on 100% battery, this phone can last for up to 2 days easily.

15 minutes of heavy gaming and 30 minutes of watching high-quality videos consumed only 4% battery. Moreover, Google Maps consumes a lot

of juice, but an hour of Google Maps only consumed 3% of this phone's battery while I was testing it.

But with long-lasting battery backup, it takes a lot of time to charge too. The Vivo T4x 5G charges from 0-100% in 1 hour 38 minutes.

VERDICT

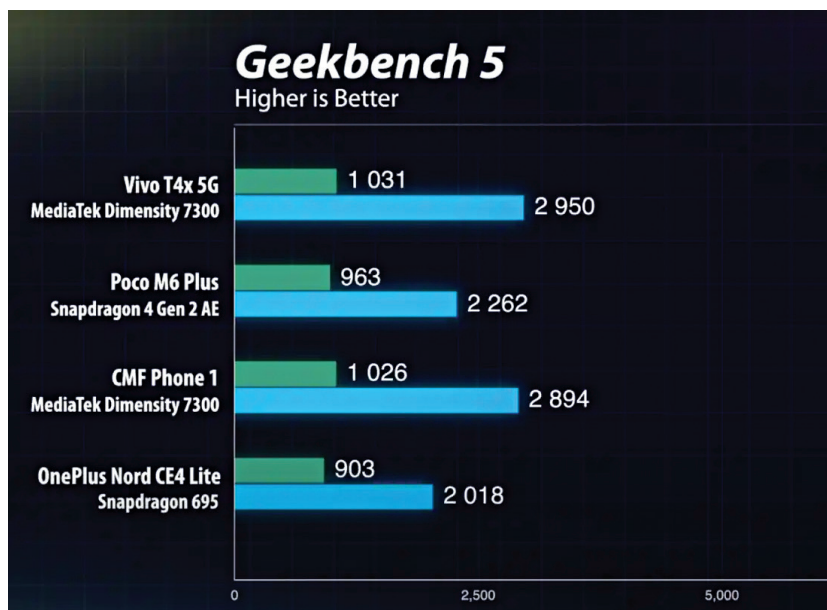

Now if you remember I said the T4x 5G is an exceptional case because after testing it and using it for a couple of days, I feel that this one is a perfor-

mance-packed smartphone under Rs 15,000. It has no heating issues, it even scored well in our testing, it runs high graphics on BGMI, and the battery of this phone is also pretty good!

Apart from that, the camera is also not that bad, I would say it's decent for the price you are paying. And the same goes for the display also. I don't see too many options offering performance, a massive battery backup, decent cameras, and a great display for just Rs 12,999.

So, you are getting a great overall package. Yes, what leaves room for improvement is its UI, which has so many pre-installed apps, and the display protection could have been better too.

—Mustafa Khan

SPECIFICATIONS

Processor: MediaTek Dimensity 7300 | GPU: Mali-G615 MC2 | RAM: 6GB/8GB | Storage: 128GB/256GB | OS: Android 15, Funtouch OS 15 | Display: 6.72" LCD, 2408 x 1080 pixels | Refresh Rate: 120 Hz | IP Rating: IP64 | Cameras: 50 MP + 2 MP | Selfie Camera: 8 MP | Video: Up to 4K at 30 fps | Battery Capacity: 6500 mAh Si/C | Charging: 44 W (wired)
