Microsoft Edge vs Google Chrome: Which is better?

Google Chrome has been the default browser for most people around the globe. And it has been dominating the web browser market for a while. A lot of companies tried to beat it to its own game, but that didn't happen. However, Microsoft Edge has steadily gained popularity by offering

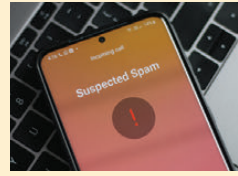

powerful tools and enhanced productivity features. And while both of these browsers have a smooth browsing experience to offer, we feel that Edge stands out in some places which makes it a better browser choice. So, here are 5 reasons why we feel that Microsoft Edge is a better browser.

When you are working, and you have multiple tabs to handle, it can become a hassle on Chrome. But Edge's vertical tabs feature makes it easy to view and organise open tabs without cluttering the screen. This is especially useful for large monitors and users who juggle multiple research tabs.

With Edge, you can even use Microsoft Drop which makes transferring files between a PC and mobile device seamlessly. Unlike Chrome, which lacks a built-in solution, Edge allows users to send files, images, and notes across devices using OneDrive. This reduces the need for carrying USB cables or using third-party cloud services. tinyurl.com/ycx5vvt9

Beware of new robocalling scam: How it works

Just when we think we've seen it all, a new scam pops up. This time, it's a robocall that threatens to cut off your phone services unless you press

9 to "know more." Sounds familiar? You're not alone. An X.com user warned users, when he wrote, "New scam. I just received a robocall from a mobile number saying that my phone services will be terminated today. To know the reason, it asked me to press 9." The tipster also shared the number: +917971813559. It may seem like a genuine warning from your service provider, but it's actually a trap. tinyurl.com/3afhnu9h

Starlink India launch gets closer: Check details

Elon Musk's owned SpaceX seems to be all set to introduce its Starlink services in India in collaboration with telecom giants Airtel

and Jio. This comes after the Union Commerce Minister Piyush Goyal met with Starlink executives and discussed the investment roadmap in the country.

During the meeting, Goyal discussed satellite technology, existing global partnerships and proposed expansion plans.

According to the report, once approved, the company plans to roll out the services in phases across India. tinyurl.com/47ryyea8
