

IQOO Z10 REVIEW: CAMERA

The cameras on this phone are a mixed bag. The main sensor delivers decent results in daylight, with good colour reproduction and sharpness.

Portraits, thanks to the 2-megapixel depth sensor, look surprisingly good with natural background blur and accurate edge detection.

But selfies are a weak point; there is facial smoothing and inconsistent colours.

IQOO Z10 REVIEW: BATTERY

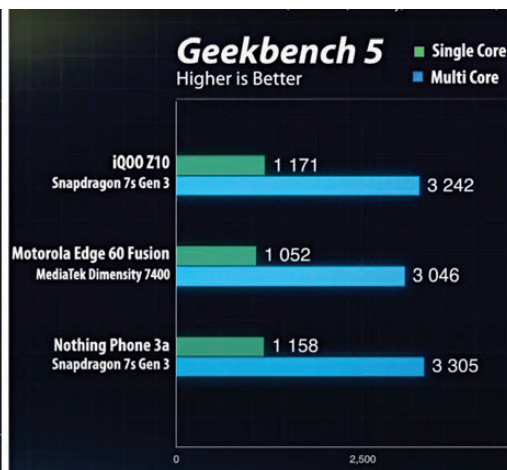

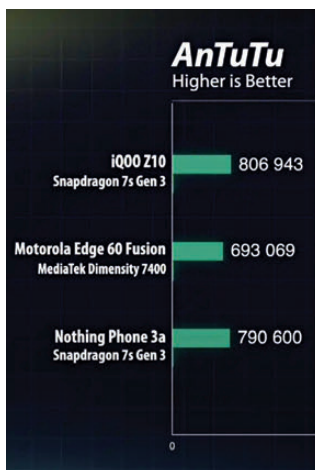

The iQOO Z10 has a massive 7,300mAh battery that is the highlight of this phone. In our PCMark battery loop test, it lasted 24 hours while only draining to 20%. With light to moderate use, you can easily expect 2+ days of battery life.

And when it does run low, the 90W fast charging gets you from 0 to 100% in just 53 minutes. Plus, there's support for reverse wired charging, turning the Z10 into a backup power bank if needed.

IQOO Z10 REVIEW: VERDICT

The iQOO Z10 is a solid value-for-money device under Rs 20,000. You get unmatched battery life, a great display, and smooth performance. Yes, there are a few compromises- 60fps gaming, average haptics, and a camera setup that is just decent. If you are someone who can live with these trade-offs, then it is a good deal for you. For someone looking for a reliable, long-lasting, and fast mid-range phone, the iQOO Z10 is a great choice.
