

APPLE IPHONE 16E VS IPHONE 16

Which entry-level iPhone should you buy in 2025?

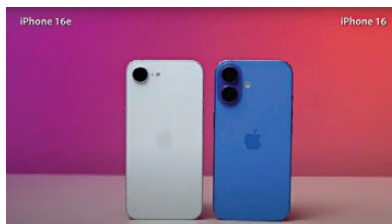

Siddharth Chauhan | editor@digit.in

Apple has reshaped its iPhone 16 lineup, replacing the ageing iPhone SE series with the new iPhone 16e. It's priced at ₹59,900, which is a full ₹20,000 less than the standard iPhone 16, making this a new entry point into Apple's ecosystem. But the iPhone 16e raises an important question: what exactly are you getting, and perhaps more crucially, what are you giving up?

Display & build quality

The iPhone 16e and iPhone 16 feature

identically sized 6.1-inch OLED displays, marking a significant upgrade from the smaller LCD screens of the iPhone SE lineup. The 16e's display supports Dolby Vision and HDR, as does the iPhone 16, ensuring premium viewing experiences regardless of which model you choose.

In our display tests, the 16e exceeded Apple's brightness claims, reaching 1,525 nits compared to the advertised 1,200 nits, nearly matching the standard iPhone 16's performance.

The most noticeable visual difference is the 16e retains the traditional notch
