

Figure 3: 4nec2 electromagnetic simulator

Figure 4: Automated antenna verification using 4nec2 electromagnetic simulation report

- Standing Wave Ratio (VSWR)
- Analytics of bandwidth
- Generation of radiation pattern
- AI for comparison with earlier designs and strategic decision making
- Auto-generation of HTML/PDF report
- AI-based platform engineering for

wireless and radio networks helps them perform much better. Real time signal strength improves and the analytics

enables dynamic antenna design so that these networks can be deployed effectively. **END** 🐧
