Smithsonian Institution

Established in 1846, the Smithsonian Institution comprises 21 museums and nine research centers, mostly clustered around the National Mall. The National Museum of American History displays Civil War artifacts from its collections, while the Patent Office Building, now home to the National Portrait Gallery, was once a Civil War barracks and hospital. The Smithsonian American Art Museum shares this building and occupies the Renwick Gallery, once the office of the Union army's quartermaster general. Opened in 2016, the National Museum of African American History and Culture examines Black American experiences of the Civil War.
