The Seven Days Battles drove Union forces back 20 miles (32km), lifting the threat to Richmond and ensuring that McClellan's campaign ended in failure.

CONFEDERATE STRATEGY

HARRISON'S LANDING

Lee had not demonstrated masterly generalship in the Seven Days Battles. He admitted: "Our success has not been as great or as complete as we should have desired." But he had set up a **moral supremacy** over the Union army, and aimed to **keep up the initiative**. As soon as his own army had recovered, he marched it north of Richmond.

Lee's strategy counted on **McClellan remaining inactive**, which he did. The Army of the Potomac dug in defensively at **Harrison's Landing** under the **protection of naval guns**. While continuing to demand reinforcements, McClellan did not **resume the offensive**. In August, he reluctantly obeyed orders to **ship the Army of the Potomac back to Washington** to assist in the **fight resuming in northern Virginia** (see [Lee's audacious offensive](#)).
