

## HUNTED HUNTERS

A flock of reptavians attack Mando and the group he is traveling with. They make off with a blurr and a Trandoshan hunter.

Wingspan is  
11.44 m  
(37 ft 6 in)

## REPTAVIAN

Reptavians are batlike creatures that are native to Nevarro. They have sharp claws and teeth and are very quiet when hunting at night.

Reptavians hunt in flocks for food that they take back to their young.
