

COMPUTEX 2025

From latest in PC peripherals and components to the cutting edge of tech encapsulating AI and beyond, this year's Computex had it all...

ANNOUNCEMENTS

ASUS

At Computex 2025, ASUS emphasized ecosystem innovation and user-centric design. The spotlight was on the BTF (Back-To-the-Future) ecosystem, which pushes for fully hidden cable designs. ASUS showcased new motherboards and cases that support rear-mounted connectors, significantly improving cable management and internal

airflow. In the GPU segment, ASUS debuted the ROG Astral RTX 5090 BTF Edition and the TUF Gaming GeForce RTX 5070 Ti BTF White Edition, both designed for seamless integration with BTF motherboards using hidden power connectors. ASUS also launched the ProArt GeForce RTX 5080 Series, aimed at creators and professionals.

Additionally, ASUS refreshed its monitor lineup with the ROG Strix Ace XG248QSG, a 540Hz esports gaming monitor; the ROG Strix OLED XG32U Series, a line of 4K OLED displays with 240Hz refresh rates tailored for immersive AAA gaming. These additions show ASUS's products for both gamers and creators for 2025 and beyond.

AMD

The announcement of the Ryzen Threadripper 9000 series highlighted AMD's commitment to professional creators and power users. In the GPU department, AMD introduced the Radeon RX 9060 XT, a mainstream graphics card available in both 8GB and 16GB versions, aimed at gamers and budget-conscious consumers. Notably, AMD also launched the Radeon AI Pro R9700, a workstation GPU with 128 AI cores and 32GB of GDDR6 memory, to fight NVIDIA in AI.

MSI

MSI introduced flagship motherboards including the MEG X870E ACE and MEG MAESTRO 900 series, offering advanced features and robust builds to meet enthusiasts' and professionals' needs. MSI also unveiled two new AIO liquid coolers engineered for efficient thermal management of demanding CPUs. On the display front, MSI launched two 27-inch 500Hz QD-OLED monitors—the MPG 271QR X50 and MAG 272QP X50—with ultra-fast 0.03ms response times.

Kingston

Leading Kingston's pack was the FURY Renegade G5 SSD, a PCIe 5.0-based drive offering blazing read speeds of up to 14,800MB/s, making it one of the fastest consumer SSDs announced to date. This SSD targets hardcore gamers and content creators who demand top-tier performance. Additionally, Kingston introduced its DC3000ME PCIe 5.0 NVMe SSDs tailored for enterprise and AI workloads, delivering up to 14,000MB/s read speeds and optimized for low-latency.
