

Core Ultra 9 285HX appears to be only a marginally overclocked version of the 275HX. At this stage, it seems Intel doesn't yet offer a significantly more powerful laptop chip beyond the 275HX. As a result, the 285HX feels more like a slight rebranding effort to push the limits of the existing 275HX, rather than a true tier upgrade.

In terms of temperatures, the 285HX runs slightly hotter compared to the 275HX. Under max load, the 285HX consistently reached 99°C and hovered around 89–90°C during gaming. In

comparison, the 275HX remained cooler, peaking at around 95°C under load and averaging around 85°C while gaming.

Things look much better on the GPU front. The Nvidia GeForce RTX 5090 delivered impressive scores of 22,138 in 3DMark Time Spy and 38,853 in Fire Strike. The RTX 5080 scored 19,770 and 36,158 in the same tests, while the RTX 5070 trailed behind with 13,958 in Time Spy and 31,384 in Fire Strike.

The MSI Titan 18 HX AI outperforms the ASUS ROG Strix G16 and the HP

Omen Transcend 16 in the PCMark 10 Extended test, scoring 12,373 compared to 10,498 and 11,009, respectively.

And lastly, in terms of gaming, the MSI Titan 18HX AI comes out on top with consistently higher frame rates across most titles. It delivered 213 FPS in Metro Exodus, 266 FPS in Dirt 5, and 230 FPS in Shadow of the Tomb Raider—all significantly ahead of the ASUS ROG Strix G16, which managed 128, 166, and 191 FPS respectively. Even in CPU-heavy titles like Civilization VI, the Titan scored 330 FPS, beating the HP Omen Max 16's 300 FPS and the ASUS ROG's 210 FPS.

CONCLUSION

The MSI Titan 18 HX AI is everything you expect from a ₹5.3 lakh gaming laptop, massive, powerful, excessive, and totally ridiculous. But it's also one of the only laptops that can truly call itself a desktop replacement in 2025.

If you're buying a Titan, you're not after balance, you're after bragging rights, peak performance, and uncompromising specs. For gamers, streamers, creators, and professionals who want the best, and are willing to pay for it, the MSI Titan 18 HX AI delivers just that.
