

■ **MAJOR SOFTWARE & OS UPDATES**

iOS 26 update: Apple Intelligence features coming to your iPhones soon

Apple will launch iOS 26 next month alongside the iPhone 17 series, bringing over 20 new Apple Intelligence features. Beta 7 highlights smarter communication tools, including AI-suggested polls, natural language search, custom backgrounds in Messages, and seamless two-way translation in calls. Voicemail summaries, smarter Maps search, and Reminders with automatic categorisation boost productivity. Wallet will track orders from inboxes, while developers can integrate Apple's Foundation Models. Creative upgrades include ChatGPT-powered Image Playground and Genmoji for custom emojis. iOS 26 also introduces Adaptive Power Mode and Visual Intelligence. Supported devices are iPhone 15 Pro/Max, iPhone 16, and iPhone 17 lineups. tinyurl.com/ios26AIz

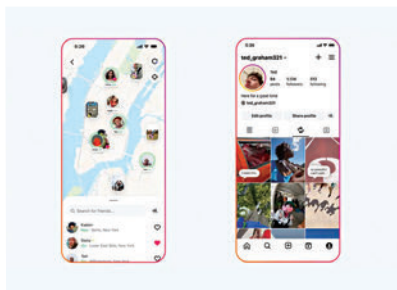

■ **SOCIAL MEDIA FEATURES**

Instagram adds Snapchat-like map, announces other new features

Instagram is introducing new features to make the app more engaging and social. The update includes the option to repost reels

to friends and followers while crediting the original creator. Another big addition is the Instagram Map, a feature similar to Snapchat's Snap Map, which shows where friends and creators are posting from. Location sharing is completely optional, with full controls to share with everyone, close friends, selected individuals, or no one at all. The Friends tab in Reels is also being added, helping you discover videos your friends are liking, commenting on, or sharing, along with personalised suggestions from Blends. These updates make staying connected and discovering trending content with your circle much easier. tinyurl.com/iscm49

and posts, which will show up in a new Reposts tab on your profile. These reposts also get recommended

E-Aadhaar app to launch soon with QR verification

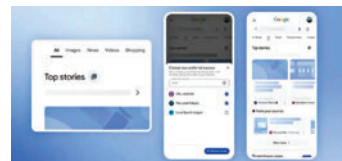

UIDAI will introduce QR-enabled e-Aadhaar by 2025, cutting reliance on photocopies and centre visits. A revamped app will allow digital updates, while database integration enhances security, and fraud prevention for over 1.3 billion Aadhaar users. tinyurl.com/eawgm2

Apple brings back blood oxygen monitoring on latest smartwatches

Apple is restoring blood oxygen monitoring on Apple Watches, including Series 8, 10, and Ultra. Models process readings via iPhone Health app, requiring iOS 18.6.1 and watchOS 11.6.1. tinyurl.com/awom26

Google now allow users to choose their preferred news sources in Search

Google has launched Preferred Sources in Search, letting users prioritise chosen outlets. Stories appear more often in "Top Stories" and a new "From your sources" section. The feature offers more personalised results. tinyurl.com/gpn25n
