

■ ANDROID 16 ROLL-OUT UPDATES

One UI 8 update: Here's when Galaxy S25 and Galaxy S24 series may get Android 16

S Samsung's One UI 8, based on Android 16, launches with the Galaxy Z Fold 7 and Z Flip 7, while beta testing is underway for the Galaxy S25, S24, and S23 series. The stable rollout begins with the S25 lineup next month, then expands to S24 models, foldables, and tablets. Supported devices include S22–S25, Z Fold/Flip 4–7, Tab S8–S10, A55, and

A35. Some of the key upgrades include dynamic AI-driven wallpapers, enhanced multitasking capabilities,

improved Quick Share, Auracast audio broadcasting, smarter AI-powered recommendations, and tighter ecosystem integration across Galaxy devices. This update focuses heavily on personalization, productivity, and seamless connectivity, strengthening Samsung's vision of creating a much needed unified experience. tinyurl.com/1uis16a

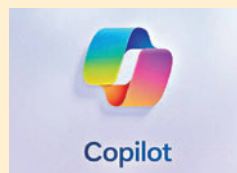

OpenAI introduces ChatGPT Go for Indian users

OpenAI has launched ChatGPT Go, its first country-specific subscription plan, exclusively for India. Priced at ₹399 per month, it can be

purchased via UPI, making it far more accessible than the Plus (₹1,999) or Pro (₹19,900) tiers. Powered by GPT-5, ChatGPT Go offers 10x more message capacity, daily image generation, extended file uploads, and double memory length for personalised, context-aware responses. Aimed at students, creators, and professionals, the affordable plan is now rolling out gradually across both the web and mobile apps. tinyurl.com/aigo5gt

Microsoft launches Copilot 3D to make 3D creation faster

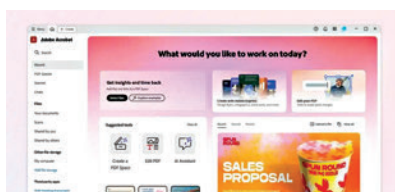

Microsoft has launched Copilot 3D, a new tool in Copilot Labs that converts 2D images into fully rendered, realistic 3D models. This tool is available for

free to limited users via Copilot.com, it supports PNG and JPG images under 10MB, exporting results in GLB format for use in 3D viewers, tools, and game engines. Models are securely stored for 28 days in "My Creations." Optimized for objects like furniture, household items, and fruit, the tool enables fast, accessible 3D creation but strongly warns against uploading people, sensitive images, or copyrighted content. tinyurl.com/3dgaic

Adobe launches Acrobat Studio with AI capabilities

A dobe has launched Acrobat Studio, an all-in-one platform combining PDF tools, AI, and creative design features. Users can upload up to 100 files - PDFs, Word documents, spreadsheets, or even website links - and Adobe's AI assistant can analyse them together, offering summaries, citations and highlights. Workspaces can be shared, along with personal-

ised AI assistants for smoother collaboration. It integrates Adobe Express, allowing users to create

infographics, flyers, social media posts, and AI-generated images without leaving the app. Essential Acrobat features like editing, signing, comparing, and redacting PDFs are included. Priced at \$24.99 per month, it provides a smart, creative hub for students, professionals, and teams who work with documents daily. <https://tinyurl.com/aswai48>
