

PREMIUM LAPTOPS

41 Dell XPS 13

Sleek, sophisticated, and quietly powerful- the Dell XPS 13 is the kind of laptop that makes you want to pick it up every morning. Its 13.4-inch

3K OLED touch display with InfinityEdge design turns work, shows, and creative projects into a visual treat, while the Snapdragon X Elite processor and Adreno GPU ensure everything runs smoothly. But what really sets it apart is its AI smarts: a Hexagon NPU delivering 45 TOPS brings generative AI and on-device enhancements to life, whether you're video calling, editing, or multitasking. Weighing just 1.17 kg, this is the ultra-light companion for professionals who crave performance without bulk and elegance without compromise.

42 2024 MacBook Pro

When we talk about premium laptops, it is hard to not think of Apple's MacBook Pro. Launched in 2024, the Apple MacBook Pro powered by the M4 chip is a solid pick for a working professional who is looking for the best experience on-the-go. A powerful processor, Apple Intelligence, and Liquid Retina XDR display results in an experience like no other. Moreover, the battery is built to last through full workdays, ensuring you are not looking for a charging port wherever you go. With built-in privacy protections and seamless macOS optimisation, this Mac-

Book Pro is the ultimate choice for creators, professionals, and anyone seeking endurance, elegance, and uncompromised performance.

43 Lenovo Yoga 9 2-in-1

What's better than a sleek laptop that looks good and performs admirably? A laptop that can do all of that, and double up as a tablet. The Lenovo Yoga 9 2-in-1's 360 degree hinge is a game changer and lets you use it as a tablet when needed. The laptop comes with a Lenovo Pen included which is super helpful for drafting quick notes, sketching ideas, or just doodling after a long day.

Further, the 14-inch 4K OLED touchscreen makes every detail look stunning, whether you're watching a YouTube tutorial or streaming your

favourite shows. The laptop is powered by Intel Core Ultra 7 with 109 TOPS NPU, 32GB RAM, and all-day battery life.

45 HP Spectre x360

Style meets substance is the first thing that comes to mind when you think of the HP Spectre x360. The laptop is perfect for editing, streaming, or sketching, thanks to its 16-inch touchscreen display. Intel's 16-core Core Ultra 7 155H processor with

44 Dell Pro 14 Premium

Designed for professionals who refuse to compromise, the Dell Pro 14 Premium balances performance, portability, and AI power beautifully. Intel's Core Ultra processor, paired with a

48 TOPS NPU, ensures local AI tasks, multitasking, video calls, and creative workflows happen seamlessly. The 14-inch FHD+ display delivers sharp, colour-accurate visuals, while the lightweight design keeps it easy to carry from meeting to meeting. For anyone who works anywhere, anytime, this laptop is built to be dependable, powerful, and intelligent.

Intel Arc graphics keeps performance fluid, while the 2-in-1 design lets you flip from laptop to tablet effortlessly. At just 1.95 kg, it's surprisingly portable for its size, and thoughtful touches like a 9MP IR webcam, backlit keyboard, fast-charging battery, and fingerprint sensor make it feel smart, sleek, and modern. Every user's delight, in many ways.
