

## GAMING LAPTOPS

### 76 Alienware 16X Aurora

When we talk about a gaming laptop, the performance matters more than anything else. After all, nobody would enjoy playing their favourite games at 30 FPS! And for

gamers who want the best performance in a futuristic design, the Alienware 16X Aurora is a showstopper. The laptop packs Intel's flagship Core Ultra 9 275HX processor with 24 cores and integrated AI acceleration, making it ready for those long and demanding gaming sessions.

Be it riding through the vast plains of Red Dead Redemption, switching to the bustling streets of GTA V, or facing hordes of demons in DOOM,

the laptop will run all these titles with buttery-smooth frame rates and breathtaking graphics. Its 16-inch WQXGA display with a 240Hz refresh rate ensures every explosion, car chase, and cinematic cutscene is fluid and immersive.

The combination of Intel Core Ultra 9 275HX processor and NVIDIA RTX 5060 GPU guarantees that even the most demanding AAA titles run without a hitch, while 16GB DDR5 RAM and a 1TB NVMe SSD make loading times virtually disappear. The AlienFX RGB lighting further adds a signature flair that makes your setup pop. At 2.57kg, this laptop is hefty, just like every gaming beast is.

### 78 Lenovo Legion Pro-7i

For gamers looking for a relatively sleek, portable machine that can handle esports titles like a pro, the Lenovo Legion Pro-7i is the obvious choice. The laptop comes with a 16-inch OLED display with 240Hz refresh rate and can power through all of your Steam library with no hiccups. For instance, games like League of Legends, DOTA 2, Valorant, Helldivers, GTA V and more run buttery smooth on this device and

result in an immersive experience.

This laptop is perfect for players who want speed, space, and performance without compromise, making it a reliable companion for extended gaming sessions or on-the-go LAN parties.

### 79 Raider 18 HX AI

This is a no-compromise gaming machine from MSI that has been designed to dominate. With its Intel Core Ultra 9 285HX processor running up to 5.5GHz turbo and NVIDIA RTX 5080 laptop GPU, even 4K gaming is seamless, letting you tackle Red Dead Redemption's open-world vistas, GTA V's chaos, or DOOM's hellish battlegrounds with ease. The display ensures vibrant, lifelike colors and crisp detail, while 64GB DDR5 RAM and dual PCIe SSDs guarantee multitasking dominance. You can stream, record, and play games on this laptop simultaneously without breaking a sweat. Thus, for gaming influencers, this laptop is all they need. Further, Advanced AI tuning optimizes performance per game, Thunderbolt 5 ports expand connectivity, and per-key RGB lighting adds that extra layer of immersion.

### 77 Alienware 18 Area 51

Gaming means zero compromises. And this is exactly what the Alienware 18 Area-51 promises. A true powerhouse that is tailor made for serious gamers, the laptop sports a huge 18-inch QHD+ display with 300 Hz refresh rate for that ultra-smooth graphics and immersive feel.

Inside, a 24-core Intel Core Ultra 9 275HX processor and up to an Nvidia GeForce RTX 5090 (RTX 50-series) GPU ensure the most demanding titles like Red Dead Redemption 2, Doom: The Dark Ages, Metro Exodus and other games run easily at maximum quality settings.

With high-speed DDR5 memory, PCIe 5.0 SSD storage, Cryo-Chamber cooling, and mechanical Cherry MX keyboard, this laptop brings raw performance, style, and reliability to those long gaming sessions. This is not just a laptop but a full-fledged gaming rig that you can take with you anywhere.

### 80 ROG Strix SCAR 16

For gamers looking for precision, power and a fully-immersive experience, the ASUS ROG Strix SCAR 16 pushes the limits of portable gaming. From the latest AAA story-mode titles to FPS games requiring utmost precision, the laptop runs them all with finesse. Under the hood, there is the Intel Core Ultra 9 275HX processor paired with NVIDIA's flagship RTX 5090 laptop GPU boasting 24 GB of dedicated VRAM. For pro-level gamers and streamers, this laptop delivers power, precision, and pure dominance.
