Apple is entering its next phase of growth in India with the launch of a new flagship store in Bengaluru. This is Apple's first retail store in India's tech capital and third in the country after Delhi and Mumbai. The move is in line with Apple's intent to capture the premium smartphone segment in the country and aligns with its recent push to local manufacturing. The Bengaluru store called - Apple Hebbal - is located in Phoenix Mall of Asia.

With the new store, Apple wants to support the local community and since Bengaluru is a hub for entrepreneurs and developers, it was an obvious

choice, Apple's Vanessa Trigub told us in an exclusive chat.

The Bengaluru store was soon joined by an Apple Store in Pune.

"It's amazing how many small businesses and developers are here in Bengaluru. So we couldn't not be here. I am so excited to be here. Then, Pune is the culture and educational capital of India. It's so exciting to support these two communities with Apple technologies and enable them to create," Vanessa said, about the location for these two stores.

Just like any other Apple store, Apple Hebbal will enable customers to explore the latest products, including

the iPhones, MacBooks, iPads, Apple Watches and all other accessories. The visitors can also get a personalised shopping session with an Apple Specialist and receive expert support at the Genius Bar. The dedicated Apple Pickup area lets customers easily collect their online orders at a time that's convenient for them.

Apple Stores uniquely offer Today At Apple sessions, where anyone can get more info about Apple products and their use cases.

"It's an option for our customers to book an appointment and walk in directly. And, take sessions about how to use their technology better. They can also set up a group session wherein they can come with a group of friends. These sessions will help the communities in both Bengaluru and Pune," she said.

The Apple Hebbal store will have a team of 70 members that come from 15 different states across India. The team will help customers learn about Apple products, monthly financing options, and the Apple Trade In program. Like all Apple facilities, Apple Hebbal runs on 100 percent renewable energy and is carbon neutral.

Apple has already announced two more stores in India - set to open in Delhi/NCR and Mumbai.

Apple already has two stores in India - one each at Mumbai's BKC and Delhi's Saket. Both of these stores were opened in April 2023, accelerating Apple's growth in India, contributing over ₹800 crore in revenue. They have been among Apple's top-performing outlets globally.

"I had the pleasure of being at the opening of Delhi and Mumbai stores. The energy our customers brought all the way through today is unbelievable. We are so excited about the ability to connect with the community and help consumers discover all of Apple at once place," Vanessa added.

Apple continues to sell products through its online store, as well as through major e-commerce players.
