

GHOST

OF YŌTEI

20 THINGS TO KNOW BEFORE YOU PLAY

By Mithun "Barbarian Monkey" Mohandas | feedback@skoar.in

Sucker Punch's Ghost of Yōtei is a standalone PS5 sequel to Ghost of Tsushima, with a fresh protagonist, setting, and a sharper focus on dynamic, lethal combat. Set centuries after Jin Sakai's tale, it embraces samurai cinema, folklore, and open-world discovery. Launching 2 October 2025, with pre-orders live, recent State of Play footage showcased exploration, progression, and combat.

THINGS TO KNOW BEFORE YOU START

01 Yōtei takes place more than three centuries after Ghost of Tsushima, so you are stepping into a different era, with different politics and technologies. It is a clean jumping-on point, without the need to have played the first game.

02 Meet Atsu, not Jin. Rather than a disgraced samurai, Atsu is a hardened mercenary, a figure the locals half fear and half mythologise. Her motivation is blunt and personal, a revenge path against the Yōtei Six. The narrative leans into folklore of vengeful spirits.

03 The map shifts from Tsushima to Ezo, inspired by Hokkaidō, beneath the watch of Mount Yōtei, with windswept plains, volcanic silhouettes, and coastal hamlets. Expect Sucker Punch's painterly approach to weather and lighting, and new traversal routes that make verticality and wilderness navigation more important.

04 The Yōtei Six define your hunt. This criminal cadre includes a lord and five fearsome lieutenants, each themati-

cally tied to creatures from folklore. Your pursuit of them shapes the campaign structure and side contracts that ripple through the region.

05 Steel returns, with new teeth. The katana remains the bedrock of close-quarters combat, but you can dual-wield for speed and aggressive counters, or swap to the odachi, a heavier, longer blade that cleaves armour and controls space. The State of Play and follow-up trailers highlight stance shifts and measured timing windows.

06 Kusarigama chains, and the classic grappling hook open fresh approaches to groups and elites. You also gain access to bows and early firearms, plus throwables such as kunai, bombs, and blinds, to disrupt shields and stagger spear users before closing in.
