Claude Haiku 4.5 is better, cheaper than Sonnet: Here's how

Claude Haiku 4.5

Anthropic's latest small model, Claude Haiku 4.5, has arrived and it's rewriting expectations for what a "lightweight" AI can do. Released on October 15, 2025, Haiku 4.5 is designed to deliver near-frontier performance at a fraction of the cost, marking a major leap for developers and businesses that need speed, safety, and affordability in one package.

Anthropic positions Haiku 4.5 as the go-to model for low-latency, high-frequency tasks such as coding assistance, customer service chatbots, and AI agents that need to respond instantly. Developers can now integrate the model via the Claude API using the new claude-haiku-4-5 identifier, or access it through Amazon Bedrock and Google Cloud Vertex AI, ensuring seamless migration from previous versions like Haiku 3.5 or Sonnet 4. In early internal benchmarks, Haiku 4.5 achieved near-Sonnet-level results. tinyurl.com/y4bdxrez

Google Veo 3.1 out: Five key AI video advancements it sports

Veo 3.1 is Google's first version to feature truly integrated audio generation. Beyond visuals, it can now create synchronized dialogue, ambient soundscapes, and sound effects that match the mood and motion of the video. Whether it's the quiet hum of a city street or a burst of cinematic tension, the model ensures the auditory layer complements the visuals seamlessly. This capability extends across all modes in Flow, enabling creators to produce near-finished videos directly from a prompt. Google has introduced a new "Ingredients to Video" feature that lets users supply up to three reference images to guide generation. tinyurl.com/42ccd95m

Sam Altman defends adult-chats on ChatGPT

OpenAI CEO Sam Altman found himself in the middle of a media frenzy this week after announcing that the company plans to relax content restrictions, including allowing "erotica

for verified adults" on ChatGPT by December. While the initial news was met with accusations of

prioritizing engagement over ethics, Altman argues the shift is necessary for OpenAI. tinyurl.com/2wtjakfw
