

What was once a category filled with compromises has now become the zone where brands push the hardest on optimisation, efficiency, display quality and camera performance.

Mid-range segment delivered devices that feel more refined, better tuned and more reliable than ever. Across our testing, performance stability, displays, camera, battery efficiency and software polish, these phones emerged as the all-rounders.

Zero1 winner: **Vivo T4 Ultra**

The Vivo T4 Ultra takes the crown by delivering the most complete mid-range experience. Vivo's focus on tuning shines through, the MediaTek Dimensity 9300+ processor maintains sustained performance while keeping thermals in check.

Its AMOLED display is bright, vivid and tuned for natural colours, offering strong HDR and outdoor visibility. The 50MP

Mid-Range Phone (₹20–35K)

The segment where value meets maturity

Vivo T4 Ultra
Price: ₹35,999

OnePlus Nord 5
Price: ₹34,999

3x periscope camera, 50MP primary camera and 8MP ultra-wide camera produces detailed, clean images with stable dynamic range and better-than-expected low-light results.

5500mAh battery is another highlight, and is coupled with fast charging and a polished software experience.

Runner-up: **iQOO Neo 10R**

The iQOO Neo 10R secures its runner-up spot with sheer performance and speed. The Snapdragon 8s Gen 3 chipset paired with 12GB LPDDR5X RAM inside is tuned aggressively, making the phone feel snappier in gaming, animations and app loads. It also delivers some of the strongest benchmarks in this category.

Its flat 1.5K AMOLED display is smooth and responsive, and the primary camera leans slightly toward punchier output with high contrast, which many will enjoy.

iQOO Neo 10R
Price: ₹28,998

Best Buy: **OnePlus Nord 5**

The OnePlus Nord 5 wins our Best Buy award by offering great value in the mid-range segment. OnePlus has focused on the fundamentals, stable performance, clean software, dependable battery life and a good primary camera.

Its AMOLED display is well-calibrated, the Snapdragon 8s Gen 3 chipset delivers smooth usage without heating, and the 6,800 mAh battery offers efficiency that holds up impressively. The camera system with a 50MP primary sensor isn't chasing extremes but produces consistent, natural-looking results.
