Lenovo Legion Pro to have RTX 5090

Lenovo is reportedly preparing to showcase a rollable Legion gaming laptop at CES 2026, pushing the idea of flexible displays into high-performance gaming hardware. According to recent rumours, the concept device could be powered by Nvidia's flagship GeForce RTX 5090 laptop GPU, paired with a top-tier Intel Core Ultra processor from the upcoming Panther Lake lineup. The

standout feature is a flexible OLED display that expands horizontally, starting at 16 inches and extending to 21.5 inches or even 24 inches. Lenovo is expected to include smart power and performance tuning via its LA Core controller and

AI Engine+ software. Many details like RAM, storage, and battery remain undisclosed, suggesting the Legion Pro Rollable is a concept to explore future

gaming laptop form factors.
