

REALME GT 8 PRO VS ONEPLUS 15

Which is the best flagship under ₹75,000

Siddharth Chauhan | editor@digit.in

The best phones under ₹75,000 smartphone segment has quietly become the most exciting place in the flagship world. And right at the front of this race stand two heavy hitters: the Realme GT 8 Pro and the OnePlus 15. Both start at ₹72,999. Both use the same processor. Both claim to deliver premium experiences without the premium price. And that's exactly what makes the Realme GT 8 Pro vs OnePlus 15 comparison so compelling. But spend a week with both, and it becomes clear that they're built

for two different kinds of users and two completely different philosophies on what a flagship should feel like.

Display Quality

The fight becomes even more interesting once you switch on the displays, because on paper both look equally matched. The Realme GT 8 Pro features a 6.79-inch 2K AMOLED panel with HDR10+, Dolby Vision support, 1B colours, 144Hz refresh rate and a peak brightness of 7000 nits in extreme conditions. The OnePlus 15 counters with a 6.78-inch LTPO AMOLED display at 1.5K

resolution, with a 165Hz refresh rate, Dolby Vision, HDR10+, Ultra HDR support and a peak brightness of 3120 nits.

Real-World Performance

Because both phones run the same Snapdragon 8 Elite Gen 5 chipset, which is a 3 nm octa-core SoC with two 4.6 GHz Oryon Phoenix L cores and six 3.62 GHz Phoenix M cores, you'd expect their performance to be identical. But tuning, thermals and software integration make them behave very differently under load.

The Realme GT 8 Pro is tuned for peak aggression. Its AnTuTu score of
