

class-leading. I expected a bit more stability given the hardware on offer. Still, the bigger picture remains positive: the Find X9 feels faster, cooler, and more refined than its predecessor, with optimisation doing as much heavy lifting as raw power. For most users, this is performance you'll appreciate every single day, not just in benchmarks.

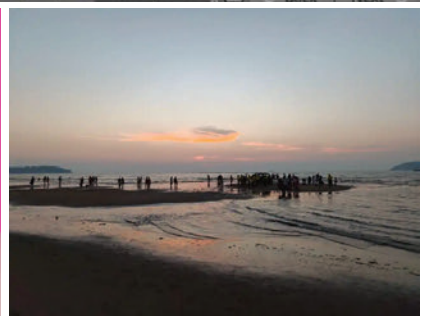

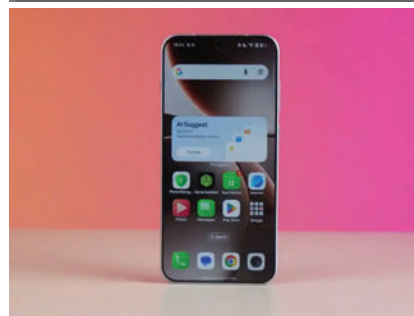

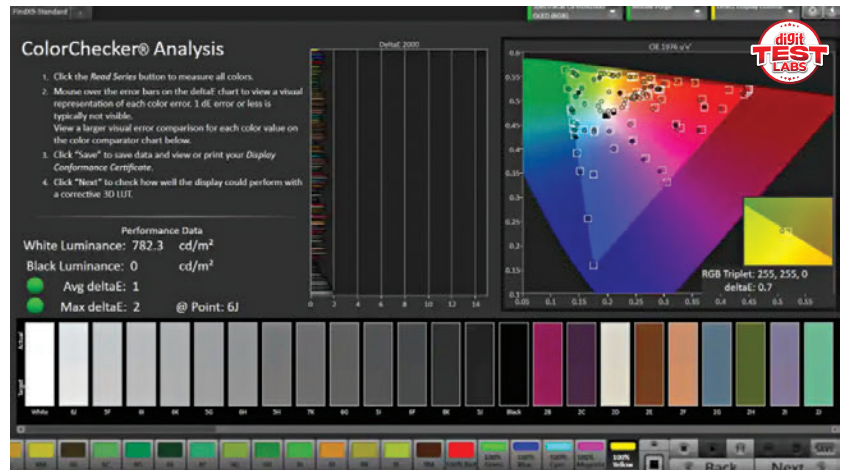

CAMERA

Oppo has always treated the Find X series as a showcase for its imaging ambitions, and with the Find X9, that philosophy is very much intact. On paper, the Hasselblad Master Camera System sounds ambitious, but what matters is how it behaves once you step outside the spec sheet, and this is where the Find X9 largely earns its reputation.

The triple 50MP rear camera setup feels well thought out rather than excessive. The main camera, with its large 1/1.4-inch sensor and wide f/1.6 aperture, consistently delivers sharp, high-contrast images without drifting into the over-processed look that is common in flagship phones. Daylight shots are particularly strong: colours are vibrant but controlled, skin tones look natural, and edge detection in portraits is clean enough to pass casual scrutiny without artifacts. Bokeh rendering feels realistic rather than artificial, which is something Oppo seems to have prioritised.

The 3x periscope telephoto is another highlight. It holds detail well and remains usable beyond its optical range, especially in good lighting. During my time taking photos in Goa, the telephoto proved reliable for candid shots and distant subjects, capturing images that were crisp without aggressive sharpening. The ultra-wide camera is impressive, maintaining consistent colours across lenses, which is still something many brands struggle to get right.

Low-light photography is where the Find X9 quietly impresses. The combination of optical stabilisation and Oppo's LUMO Image Engine allows the camera to pull in plenty of light while keeping noise under control. Night

shots retain texture and colour accuracy, instead of smearing details for the sake of brightness. The results look balanced and believable, not artificially bright.

BATTERY

While most flagships are still playing it safe around the 5,000mAh mark, Oppo has gone all in with a 7,025mAh silicon-carbon battery. What's impressive is not just the number, but the execution. Even with the bigger battery, it does not feel chunky, and is well-balanced and comfortable to hold.

In our PCMark battery test, we got 21 hours and 2 minutes, which means with a typical mix of social media scrolling, photography, navigation, video streaming and some casual gaming, the Find X9 easily gets through a full day and still has enough left for the next morning. And on less usage, it can stretch to over two days.

Even the charging speeds remain in the flagship territory. The 80W wired charging can help you charge from 0 to 100 per cent in around 46 minutes.

VERDICT

It's obvious that Oppo has focused on getting the basics right, and for the most part, it succeeds. The design is clean and practical, and the display is nicely tuned. The performance feels consistent.

The camera system is where the Find X9 justifies its position, delivering reliable, natural results across lighting conditions without excessive processing.

—Ashish Singh

SPECIFICATIONS

SoC: MediaTek Dimensity 9500 | GPU: Arm@Mali Drage MC12 | RAM: 12/16 GB LPDDR5X | Storage: 256/512 GB UFS 4.1 | Display: 6.59-inch FHD+ AMOLED panel | Refresh Rate: 120 Hz | Camera (Rear): 50 MP + 50 MP + 50 MP + 2 MP | Camera (Front): 32 MP | Battery: 7,025 mAh | Charging: 80 W wired
