

■ **APPLE'S NEW PRODUCTS**

# Apple launches new lineup of products

**A**pple has unveiled a wide range of new products, doubling down on performance, AI, and deeper ecosystem integration. The AirPods Max 2 retain their premium design but introduce improved audio quality, Adaptive Audio, Conversation Awareness, and creator-focused tools, priced at Rs 67,900. The new MacBook Air with the M5 chip brings faster performance, better AI processing,

16GB base RAM, and starts at Rs 1,19,900, while the more affordable MacBook Neo, powered by the A18 Pro chip, starts at Rs 69,900, targeting a wider audience. Apple has also refreshed its Studio Display and Studio Display XDR, now exclusively supporting Apple Silicon Macs. The iPhone

17e, powered by the A19 chip, starts at Rs 64,900 and delivers strong performance at a relatively lower price point. Meanwhile, the M4 iPad Air offers

improved speed, graphics, and AI features, making it suitable for students, creators, and professionals. [tinyurl.com/hpx3902s](https://tinyurl.com/hpx3902s)

## Dell unveils new Pro series AI laptops and workstations

Dell has launched a new lineup of AI-focused commercial PCs, targeting professionals, developers, and enterprises with an emphasis on local AI

computing. This includes Pro Precision 7 and 5 laptops powered by Intel Core Ultra processors with NPUs and NVIDIA RTX PRO GPUs, designed for tasks like 3D rendering and data-heavy workflows. The Pro Max 16 features an AMD Ryzen AI processor, offering an alternative performance profile. The Pro Max system also comes with GB300 for AI development and refreshed Pro Precision 9 tower workstations with Intel Xeon processors. [tinyurl.com/9dem37d](https://tinyurl.com/9dem37d)

## Oura enters the Indian market with Oura Ring 4

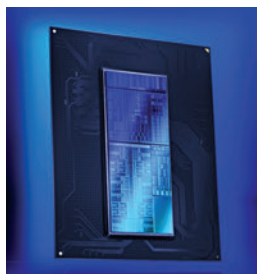

Oura has launched the Oura Ring 4 in India, expanding its presence in the wearable health segment. Priced from Rs 28,900, the smart ring

tracks over 50 health metrics, including sleep, recovery, and daily activity, using advanced sensors and personalised insights via its app. It features a lightweight titanium design, up to 8 days of battery life, and water resistance up to 100 meters. Available in multiple sizes and six colour options, the ring will be sold via Amazon and Croma starting March 18. Oura also offers a Rs 599 monthly membership for detailed insights and reports. ■ **PROCESSORS LAUNCHED**

# Intel announces Core Ultra 200S Plus

**I**ntel has launched the Core Ultra 200S Plus desktop processors, introducing new unlocked K-series chips aimed at gamers, creators, and enthusiasts. The lineup includes the Core Ultra 7 270K Plus and Core Ultra 5

250K Plus, featuring higher core counts and improved performance. Intel claims up to 15 percent better gaming performance and significant gains in multithreaded and

creator workloads. The chips support faster DDR5 memory up to 7200 MT/s, with overclocking support up to 8000 MT/s. A new Intel Binary Optimization Tool is also introduced to enhance performance in select applications. The processors remain compatible with existing 800-series motherboards.
