

Best 1.5 Ton 3-Star Inverter ACs

TO BEAT THE HEAT AND STAY COOL THIS SUMMER

Vasan GS | editor@digit.in

The summer season is in full swing, and who doesn't want to stay cool all the time? First step on that journey starts with a list of 1.5-ton, 3-star inverter ACs.

For most households, this combination offers the right balance between cooling performance, electricity consumption, and purchase price. A 1.5-ton AC is generally suitable for rooms up to 180 square feet, which covers most standard bedrooms in Indian homes. It should provide enough cooling capacity to handle peak summer temperatures without needing to run the compressor constantly at maximum power. And 3-star energy-rated models usually cost far less than comparable 5-star variants. If you have limited usage, the electricity savings difference is also smaller than many buyers expect. If you use the AC mainly at night or during the peak summer months, it can take several years to recover the higher upfront cost of a 5-star model.

Most modern ACs in this segment also use inverter compressors, which adjust speed depending on room temperature. This helps reduce power consumption and improve comfort compared to older fixed-speed models. In this article, we have considered models with smart inverter technology, R32 refrigerant and copper condenser coil.

Voltas 183V Vectra CAW

The Voltas 183V Vectra CAW 1.5 Ton 3 Star inverter split AC features an inverter compressor with a 4-in-1 adjustable cooling mode, allowing users to control compressor capacity based on room conditions. The unit delivers a cooling capacity of about 4800W. It uses a copper condenser coil and R32 refrigerant for efficient heat transfer and durability. Key features include high-ambient cooling up to around 52°C, turbo cooling mode, 4-way air swing, anti-dust filtration, and SuperDry dehumidification, along with low noise operation and standard inverter efficiency.

The company offers a 5-year comprehensive warranty on the product for purchases made between 19 September 2025 and 31 March 2026. It also includes a 10-year warranty on the inverter compressor and a 5-year warranty on the PCB for purchases made from January 2025 onwards.

Price: ₹30,990

Hisense AS-18TR4R3E1

The Hisense 2025 1.5 Ton 3 Star inverter split AC delivers a cooling capacity of around 4800W, powered by an inverter compressor that adjusts speed based on heat load to maintain stable temperatures. The AC uses R32 refrigerant and a copper condenser coil for efficient heat transfer and durability. Key

features include 5-in-1 convertible cooling, turbo quick-chill mode, 4-way air swing, health and PM 2.5 filters, self-clean function, and remote glow buttons for easy operation in the dark. The brand offers a 1 year com-

prehensive warranty on the product, 5 year warranty on the PCB and 10 year warranty on the compressor.

Price: ₹30,990

Hitachi 3400SXL RAS. D318PCCIBS

Hitachi's Xpandable inverter technology allows the compressor to adjust cooling output depending on the heat load. The system can also temporarily boost compressor speed for faster cooling.

The AC also includes FrostWash technology that cleans the evaporator coil by freezing and melting accumulated dust. The condenser has a copper coil, and there is also an anti-corrosive Nano Tech Ultra coating. The rest of the repertoire consists of 5 fan speeds and penta-sensor smart cooling.

You can avail of a standard warranty of 1 year, 10 years on
