

such conditions better and improve long-term reliability.

The cooler also includes honeycomb pads and strong air delivery, which helps maintain consistent cooling performance during hot summer days. It comes with a 1-year warranty.

Price: ₹9,499

LivPure Aerofrost-Neo-90L desert air cooler

Key features: 90L tank | Honeycomb pads | High airflow motor | Thermal protection

LivPure's Aerofrost Neo offers strong airflow of 3,800 CMH, 447 sq ft coverage, and a 40 ft air throw distance. The cooler uses honeycomb cooling pads that retain water and improve cooling efficiency. It is inverter compatible.

It also includes a motor with thermal protection, which helps prevent damage if the motor overheats due to voltage fluctuations or extended operation.

The company is offering a 1-year warranty on the product and a 2-year warranty on the fan motor.

Price: ₹9,499

Orient Electric Tornado 85L desert air cooler

Key features: 85L tank | DenseNest honeycomb pads | Long air throw | Auto swing | 3,500 m³/hr

Orient's Tornado cooler focuses on strong airflow and efficient cooling pads. It is rated to work within 400 sq ft coverage area.

It uses DenseNest honeycomb pads, which are designed with tighter structures to hold more water. More

Things to consider...

When buying an air cooler in India for the summer months, the most critical factor is matching the device to your local climate and room size. For the dry heat of North and Central India, Desert coolers with large tanks (60–100L) are ideal, whereas compact Tower or Personal coolers suit smaller apartments or coastal regions. Prioritize models with Honeycomb cooling pads, as they are more durable and provide better evaporation efficiency than traditional wood wool. Since power cuts are common, ensure the unit is inverter-compatible. For maximum effectiveness, always place the cooler near an open window to maintain cross-ventilation.

water retention improves the evaporation process and helps generate cooler air.

The cooler also delivers long air throw up to 53 ft, which should help in moving cool air across larger spaces. Auto swing louvres should help distribute the airflow evenly so the entire room benefits from the cooling effect.

Price: ₹9,490

Havai Thunder 17+ 100L desert cooler

Key features: 100L tank | 17 inch fan blade | Honeycomb pads | Long air throw

The Havai Thunder 17+ is designed for heavy-duty cooling in larger spaces, thanks to its 100-litre water tank for extended operation.

One of its highlights is the large 17-inch fan blade. Larger fans move more air per rotation, which improves airflow and air throw distance.

The cooler also uses honeycomb pads for efficient evaporation. Its long air throw helps push cool air deeper into the room of up to 400 sq ft. It supports an air throw range of 15 ft. It offers a 1-year motor warranty and post-warranty service.

Price: ₹9,289

Symphony 75XL+ 75L desert air cooler

Key features: 75L tank | Honeycomb pads | Air filtration system | Inverter compatible

This Symphony desert air cooler comes with a 75-litre tank and Cool Flow Dispenser (CFD technology) for uniform air distribution. It works within a room size of 269 sq ft.

The cooler uses honeycomb pads and also includes Symphony's air filtration system, helping remove dust and particles before air passes through the cooling pads.

The cooler is also designed for inverter compatibility and low power consumption, making it useful during long power cuts.

Price: ₹8,991

Thomson 95L desert air cooler

Key features: 95L tank | Honeycomb pads | 5,800 CFM High airflow

The Thomson cooler sports a 95-litre tank. It supports 55 ft air throw and 4-way cooling.

A larger tank allows the cooler to operate for long hours, especially useful during hot nights when constant cooling is required.

The cooler uses honeycomb cooling pads that improve water retention and cooling efficiency. The pads absorb water and expose a large surface area to incoming hot air, which helps lower the air temps.
