

Best portable table fans

THAT RECHARGE EASILY WITH A USB CABLE

Agent 001 | editor@digit.in

Rechargeable table fans have become quite popular in recent years, especially for people who work from home or face regular power cuts. Unlike traditional table fans, these are lightweight, cord-free during use, and can be powered through a laptop, power bank, or any USB adapter.

The biggest advantage is portability. You can move them between rooms or carry them while travelling. Here are some contenders.

Bajaj Airlight 85 MM

Key features: 8W | 1800mAh battery | 3-6 hours backup | 3500 RPM | Task lighting | USB charging

The Bajaj Airlight is one of the most affordable rechargeable fans in this segment. Despite its compact 85mm size, it operates at 3500 RPM, which provides a focused stream of air suitable for personal use at a desk or bedside table.

A distinctive feature is the integrated 360-degree task lighting. The fan doubles as a desk lamp, useful for late-night reading or working in dimly lit spaces. The 1800mAh lithium-ion battery offers about 3 hours of fan operation and up to 6 hours of lighting on a single charge. It charges via a standard USB cable, compatible with power banks and laptop ports. Bajaj offers a 1-year warranty.

Price: ₹699

Bajaj Pygmy Mini 110MM

Key features: 10W | 1800mAh battery | 4-hour backup | Multi-clip function | Silent operation | USB charging

The Bajaj Pygmy Mini features a multi-clip mechanism that allows you to mount it on a desk edge, shelf, or even a laptop screen. This versatility makes it more flexible than a standard table fan.

It runs on a 1800mAh battery with roughly 4 hours of backup and comes with 3 speed settings. Bajaj has designed this for silent operation,

making it suitable for use during sleep or in quiet office environments. The USB charging cable works with standard

adapters and power banks. It comes with a 1-year warranty from Bajaj.

Price: ₹999

Portronics Aero Breeze 178mm

Key features: 2400mAh battery | BLDC motor | 3 speeds | 360-degree rotation | 4-hour backup | Type-C charging

The Portronics Aero Breeze uses a BLDC motor, which is more energy-efficient and quieter than conventional motors. The 178mm fan head provides wider air coverage compared to smaller personal fans.

One highlight is the 360-degree rotatable head, allowing you to direct airflow in any direction, including upward. It delivers airflow from 2000 to 3000 RPM across three speed settings. The 2400mAh battery provides about 4 hours of backup via USB Type-C, making it compatible with most modern chargers. Portronics provides a 1-year warranty.

Price: ₹923

NUUK LIT v2 7-Inch

Key features: 6000mAh battery | BLDC motor | Up to 17-hour backup | Remote control | Auto oscillation | 4 wind modes | Night light

The NUUK LIT v2 is a premium rechargeable table fan with a large 6000mAh battery offering up to 17 hours of continuous airflow. This is one of the longest battery backups in this category.

The fan uses a BLDC motor for whisper-quiet operation and comes with a remote control, which is uncommon at this price point. It supports auto oscillation and 4 wind modes. A built-in night light adds bedroom utility. The design includes a natural beechwood step and a vegan leather carry strap. It charges via USB Type-C.
