

# Best kitchen chimneys

TO KEEP YOUR COOKING AREA COOL IN 2026

Vasan GS | editor@digit.in

Summers make the kitchen hot and humid, and using a cooler or fan is not practical as it interferes with the cooking process. To add insult to injury, the exhaust fan sits too far and fails to pull out smoke, oil, and heat effectively. Therefore, a chimney solves this by closely capturing fumes at the source.

Most chimneys in this segment now offer 1500 CMH or higher suction, so raw power is no longer the main differentiator. BLDC motors, noise levels, and ease of cleaning matter more in daily use. Some of you may prefer the smart features as well. We did the research factoring all these aspects across leading models to come up with the list below.

## Crompton QuietPro Plus

**Suction power:** 1800 CMH | Ducting: Optional (ductless supported) | Filterless

This model leads the list with the highest suction. It uses a BLDC motor, which helps keep noise low at around 46 dB, much quieter than most rivals.

It is a slant chimney, so headroom is better. The unit is filterless, has a built-in oil collector and uses intelligent thermal auto-clean every 30 hours. Smart features

include gesture control and auto-on. It can also work ductless: If you can't make a hole in your wall, the chimney cleans the air through filters and pushes it back into the kitchen.

**Price:** ₹19,499 | 10 years warranty on motor & 2 years overall warranty

## Whirlpool CGFL PRO 900 BLDC HAC

**Suction power:** 1600 CMH | Ducting: Mandatory | Filterless

A strong value option with a curved glass design. It offers 9-speed control with an RPM display, which gives better control over airflow. Noise is rated around 58 dB. It is filterless with thermal auto-clean. Gesture controls and digital feedback add to usability. Works best with proper ducting.

**Price:** ₹15,990 | 11 years warranty on motor & 5 years comprehensive warranty

## Elica SPT MAX FL 900 BLDC HAC LTW MS NERO

**Suction power:** 1600 CMH | Ducting: Optional | Filterless

This is a T-shaped chimney designed for wider coverage. It requires ducting for optimal performance.

Otherwise, it can work ductless using a charcoal filter. It uses a BLDC motor, runs at about 48 dB, and includes motion controls, oil collection tray and a digital RPM display.

Filterless design with thermal auto-clean. It also has 2 LED lamps on the surface.

**Price:** ₹18,989 | 15 years warranty on motor & 5 years comprehensive warranty

## Glen Hood Fabia 90

**Suction power:** 1600 CMH | Ducting: Optional | Filterless

A curved glass chimney with a BLDC motor. Noise is around 58 dB. It requires ducting and uses filterless technology with thermal auto-clean. Motion sensor controls are included. It can self-clean every 15 hours of usage.

**Price:** ₹19,990 | 7 years warranty on motor & 1 year warranty on the product

## Beyond Appliances Eris

**Suction power:** 1500 CMH | Ducting: Mandatory | Filterless

Eris brings a different approach with a built-in 7-inch Android infotainment screen. It supports Wi-Fi, Bluetooth, and has 5W speakers. Noise is around 58 dB. It is filterless with thermal auto-clean and includes features like LPG alerts, auto chimney cut off. The smart screen is the key differentiator here. It needs ducting.

**Price:** ₹19,999 | 10 years warranty on motor & 2 year warranty on the product
