

Raspberry Pi

The Raspberry Pi is a mini-computer, made to teach people how computers work. It connects to all kinds of devices, such as TVs, cameras, and even robots, and has enough power to run similar programs to a full-sized computer.

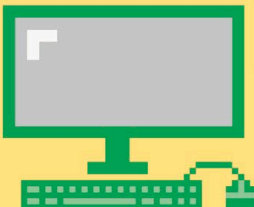

Micro SD card

A tiny memory card stores the operating system, programs, and data.

Connector for LCD display panel

A liquid crystal display (LCD) panel can be connected to this port.

HDMI video

A computer screen or modern television can be connected to this port.

Camera port

Attaching a camera lets the Pi take photos and videos.
