

GPIO pins

Lights or buzzers can be attached to these pins. They light up or sound when the Pi is in use.

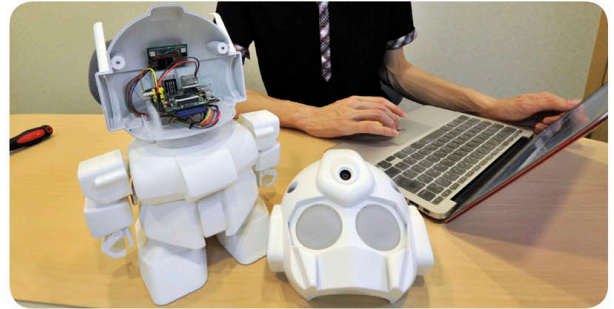

Audio output

Headphones or speakers can be connected here for listening to music.

Pi in action

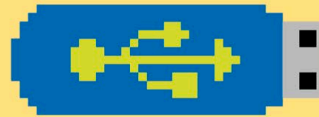

Japanese engineer Shota Ishiwatari created the humanlike robot "Rapiro," which works with a Raspberry Pi. The Rapiro has eyes that can be lit up with LED lights, and can walk and move its arms.

Rapiro the robot

USB ports

A mouse and keyboard can be connected to these ports for use with a computer screen.

LAN port

The Raspberry Pi can access the Internet with a wired connection using this port.
