

Speak Code

There are many different coding languages, such as Python, Ruby, and C++. Learn as many as you can so you can write code for different things.

Code together

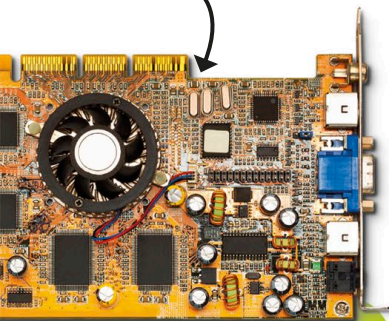

You don't have to learn coding by yourself. It is taught in schools all over the world. One of the most fun ways to code is with a partner or as a member of a team. Once you know your stuff, you could even teach someone else to code.

Be a robot master

Robot kits let you build a robot quite easily. You can then tell the robot what to do by writing instructions in code.

Motherboard connects different parts of the computer.

You can use code to control a robot car.
