

Europe

Nearly 200 years ago, European scientists were the first to correctly identify dinosaur remains. In 1824, the bones of a “great lizard” were given the scientific name *Megalosaurus*.

Africa

The Sahara Desert is a hot spot for human dinosaur hunters. *Spinosaurus* was first discovered there, while *Kentrosaurus* was found in Tanzania, East Africa.

Asia

More dinosaurs have been found in China and other parts of Asia than anywhere else in recent years, including the feathered *Velociraptor* and *Sinosauropteryx*.

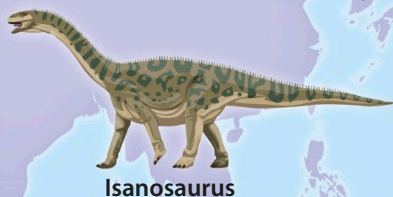

Velociraptor

Sinosauropteryx

Isanosaurus

Australia and New Zealand

Dinosaur Cove is a coastal site in Victoria, Australia, where many discoveries were made in the 1970s. The continent's most complete skeleton is the plant-eating *Muttaburrasaurus*.

Muttaburrasaurus

Antarctica

Dinosaurs, including the crested hunter *Cryolophosaurus*, lived in Antarctica when the climate was warmer and it was covered in forests instead of ice.
