△ **Mother****Date** 1916 **Country** UK**Weight** 31.4 tons (28.4 tonnes)**Engine** Daimler gasoline, 105 hp**Main armament** 2 x QF 6-pounder
Hotchkiss L/40 guns

This vehicle first demonstrated the iconic rhomboid design that gave British tanks their mobility. The high nose allowed the tank to cross tall obstacles and pull itself out of trenches if it toppled forward. The track design forced the armament into sponsons. Its lack of suspension meant a rough ride for the eight-man crew.

▷ **Holt 75 Gun Tractor****Date** 1918 **Country** USA**Weight** 11.8 tons (10.7 tonnes)**Engine** Holt 4-cylinder gasoline,
75 hp**Main armament** None

The Holt 75 was the Allies' standard heavy artillery tractor, with 1,651 delivered between 1915 and 1918. The poor ground conditions were not confined to the battlefield, meaning that tracked vehicles such as this were vital for hauling artillery, supply trains, and other essentials.
