

◀ Type SU 60

Date 1960 **Country** Japan

Weight 14.6 tons (13.2 tonnes)

Engine Mitsubishi 8HA21 WT diesel, 220 hp

Main armament .50 Browning M2 machine gun

By the late 1950s, Japan's economy had recovered enough for the country to be able to build its own military equipment. The Type SU 60 was one of its first vehicles. It had a crew of four and space for six infantrymen. Unusually for a postwar vehicle, it was armed with a 7.62 mm bow machine gun.

▽ M113A1

Date 1960 **Country** USA

Weight 12.1 tons (11 tonnes)

Engine Detroit Diesel 6V-53 diesel, 212 hp

Main armament .50 Browning M2 machine gun

Highly successful, more than 80,000 M113s were built in over 40 variants for at least 44 countries. Early vehicles had a gasoline engine, but this was soon replaced by a diesel equivalent. Many users developed their own upgrades to keep the vehicles viable in the 21st century, and gave them nicknames that included "bathtub" and "elephant shoe."

Smoke launchers

Side skirts protect tracks

Armor includes kevlar plates to protect against IEDs

▷ FV432 Bulldog

Date 1963 **Country** UK

Weight 16.8 tons (15.2 tonnes)

Engine Rolls-Royce K60 No4 Mk 4F multifuel, 240 hp

Main armament 7.62 mm L7 machine gun

The standard British APC for almost 30 years, the FV432 remains in use in the 21st century. The latest Bulldog variant was developed for service in Iraq and features a new engine and transmission, extra armor, and improved systems. It is part of the FV430 family, which also includes mortar, ambulance, command, communications, and recovery vehicles.
