

Smoke grenade launchers

Armored skirt

◁ Marder 1

Date 1971 **Country** West Germany
Weight 38.5 tons (35 tonnes)
Engine MTU MB 833 Ea-500 diesel, 600 hp
Main armament 20mm Rheinmetall Rh202 cannon

The first Western IFV, the Marder carried six infantrymen. Early versions had firing ports and a remotely controlled machine gun above the rear ramp. Later, thicker armor and the MILAN antitank missile were added. Marder served throughout the Cold War, but first saw service in Kosovo in 1999.

20 mm Nexter M693 cannon

Entry ramp at rear

△ AMX 10P

Date 1973 **Country** France
Weight 16 tons (14.5 tonnes)
Engine Hispano-Suiza HS 115 diesel, 260 hp
Main armament 20 mm Nexter M693 cannon

The first French IFV carried eight infantrymen and a crew of three who entered and exited through a ramp at the rear. The AMX 10P was sold to various countries, including Saudi Arabia, Singapore, and Indonesia, the latter receiving a variant with a 90mm gun designed for its marine corps.

Welded rolled steel armor

Ground clearance of 37 cm (15 in)

▷ AIFV (Armored Infantry Fighting Vehicle)

Date 1977 **Country** USA
Weight 15.1 tons (13.7 tonnes)
Engine Detroit Diesel 6V-53T diesel, 267 hp
Main armament 25 mm Oerlikon KBA-B02 cannon

The AIFV was based on the M113 APC, but had firing ports, a turret, thicker armor, and an infantry capacity of seven. Its largest user was the Netherlands, which operated over 2,000 vehicles in several variants (naming it YPR-765), some of which saw action in Afghanistan.

Stowage bin

Variant armed with .50 Browning M2

▷ BMP-2

Date 1980 **Country** Soviet Union
Weight 15.8 tons (14.3 tonnes)
Engine UTD 20/3 diesel, 300 hp
Main armament 30 mm 2A42 cannon

Shortcomings in the BMP-1 led to the development of the BMP-2. Its cannon had a much higher rate of fire and elevation, and its two-man turret gave the commander a better view. It carried seven infantry and served in Chechnya and Afghanistan. Like the BMP-1, it was widely exported.

Turret for commander and gunner

Hull firing ports
