

CVR(T) Family

Developed during the 1960s for the British Army, the Combat Vehicle Reconnaissance (Tracked) family was a range of lightweight vehicles that were constructed from common components for ease of manufacture. They were lightly armored and made of aluminum, and so could readily be moved by air. After decades of service with forces around the world, these vehicles were upgraded: the gasoline engine was replaced by a more powerful diesel one, while the Stormer was developed with a lengthened chassis.

▷ FV101 Scorpion
Date 1972 Country UK
Weight 8.9 tons (8.1 tonnes)
Engine Jaguar J60 No1 Mk100B gasoline, 190 hp
Main armament 76mm L23A1 rifled gun

The world's fastest tank, at 51mph (82km/h), the Scorpion was a light reconnaissance vehicle with a three-man crew. It was by far the most widely exported CVR(T) vehicle, sold to around 20 countries. An upgraded variant with a 90mm gun was later developed.

Road wheels

Stowage bin

◁ FV107 Scimitar
Date 1974 Country UK
Weight 8.6 tons (7.8 tonnes)
Engine Jaguar J60 No1 Mk100B gasoline, 190 hp
Main armament 30mm L21A1 RARDEN cannon

A version of the Scorpion with a lighter, faster firing cannon, the Scimitar is intended for close reconnaissance. With their low ground pressure, Scimitars and Scorpions proved to be the only armored vehicles that could negotiate the soft, muddy terrain of the Falklands in 1982.

Swingfire missile launcher

Commander's cupola

Smoke grenade launchers

◁ FV103 Spartan
Date 1977 Country UK
Weight 9 tons (8.1 tonnes)
Engine Jaguar J60 No1 Mk100B gasoline, 190 hp
Main armament 7.62mm L7 machine gun

An APC, the Spartan can carry five soldiers and two crew members. This capacity is too small for a standard British infantry section, so it is generally used to carry specialists such as antitank missile teams or mortar-fire controllers.

◁ FV105 Sultan
Date 1977 Country UK
Weight 9.5 tons (8.6 tonnes)
Engine Jaguar J60 No1 Mk100B gasoline, 190 hp
Main armament 7.62mm L7 machine gun

The Sultan is used by commanders at all levels, including in units that are not equipped with other CVR(T) variants. It provides enough room for a map board and desk, space for multiple radios, and has a tent that can be attached to the rear to provide more space for the commanders.
