

EXTERIOR

Scorpions were intended to perform tasks such as reconnaissance and screening (providing cover for a main force). Features of the exterior reveal this role. The cable drum on the side of the turret, for instance, allows an observer to take a communications handset away from the vehicle into an observation post. At 0.5in (12.7mm) thick, its light aluminum armor offers protection against small-arms fire and shrapnel, but nothing heavier.

1. Insignia 2. Maneuvering light 3. Driver's periscope
4. Engine bay 5. Smoke grenade dischargers 6. Infrared light casing 7. Coaxial machine gun 8. Commander's periscope with wiper blade 9. Tools stowed on hull 10. Fire extinguisher 11. Camouflage netting basket 12. Cable drum 13. Track and idler wheel 14. Exhaust
