

EXTERIOR

The Renault improved many of the shortcomings of the first French tanks that went into combat. The large front wheel with wooden inserts enabled it to climb in and out of shell holes, and the detachable “tail” extended its trench-crossing ability. Also, the turret had a small dome that served as a cupola and could be opened for ventilation.

1. Serial number 2. Idler wheel 3. Spring to tension top roller rail 4. Driver's hatch 5. Paired suspension wheels 6. 37mm Puteaux gun and recuperator 7. Engine cover lock 8. Exhaust silencer 9.
