

EXTERIOR

The Vickers Medium was constructed with riveted armor plate—0.25 in (6.25 mm) thick on the front, which was protection against bullets but little else. However, the Royal Tank Corps, formed in 1923, became highly skilled at firing the 3-pounder gun on the move, an achievement that enabled them to keep up their mobility and become a harder target for enemy gunners to hit.

1. HQ Command tank tactical sign 2. Light shroud
3. Headlight 4. Engine air intake 5. Driver's hatch
6. Coaxial Vickers machine gun mount 7. Hull wall ball-mount Vickers machine gun 8. Main armament sight aperture
