

EXTERIOR

To spread out the large weight of the tank, the road wheels are positioned in an interleaved system, copied from earlier German half-track designs. Sixteen torsion bars provide suspension—eight arms on each side, each arm holding three wheels, which meant that to replace just one of the inner wheels, nine had to be removed. The size of the tank led to innovations such as removing outer road wheels and installing thinner transportation tracks for train travel. This tank, Tiger 131, still shows exterior battle damage from the day of its capture.

1. National recognition symbol 2. Driver's vision port 3. Turret lifting lug 4. Radio operator's machine gun 5. Smoke grenade dischargers 6. Drive sprocket and interleaved road wheels 7. Commander's hatch 8. Turret pistol port 9. Towing cables and wire cutters on hull 10. Fiefel air filter tubes 11. Track toolbox
