

A statue of a seated figure, likely a religious or historical figure, holding a book or tablet. The figure is shown in profile, facing left, with long, wavy hair and a beard. They are wearing a draped garment, possibly a robe or cloak, which covers their torso and legs. The figure's hands are positioned to hold a rectangular object, likely a book or a tablet, which is held vertically. The statue is set against a dark, solid background, which makes the lighter-colored figure stand out. The lighting is soft, highlighting the contours of the figure's face, hair, and clothing. The overall style of the statue suggests a classical or neoclassical origin.

triangle

What use is Pascal's triangle?

You can use Pascal's triangle to count ways of combining things. Imagine you're buying an ice cream cone.

If there are 5 flavours, how many combinations of flavours are possible? Count down 5 rows

from the top (counting the top row as zero) for the answer: **1** way of having

no flavours, **5** ways of
having 1 flavour, **10**

ways of having 2
flavours, **10** ways
of having 3, **5**
ways of having 4,
and **1** way of
having all 5
flavours.
