

SAROS™

RETURNAL'S MORE FORGIVING AND CINEMATIC SUCCESSOR FINALLY ARRIVES

By Mithun "Barbarian Monkey" Mohandas | feedback@skoar.in

Saros is unmistakably a Housemarque game and that's evident within the first few minutes of setting foot in the world. It has the studio's familiar obsession with movement, timing, projectile readability, and that almost musical sense of combat chaos. But it is not simply Returnal with a new planet and a new protagonist. It is a more approachable, more cinematic, and in some ways more emotionally direct evolution of Housemarque's third-person bullet-hell formula.

Developed by Housemarque and published by Sony Interactive Entertainment, Saros is a single-player PS5 exclusive that launched on 30 April 2026, and is currently priced at ₹4,999 for the Standard Edition in India and \$69.99 in the US. It is also

PS5 Pro Enhanced, with DualSense vibration and trigger support listed on the PlayStation Store. The PS5 Pro isn't available yet, but if you've managed to get one through other means, then there's something to look forward to in this game.

The game takes place on Carcosa, a shape-shifting alien planet trapped beneath an ominous eclipse. Players step into the suit of Arjun Devraj, a Soltari Enforcer performed by Rahul Kohli, who arrives on Carcosa looking for answers connected to a missing off-world colony and his own deeply personal loss. Housemarque describes Saros as a haunting action game built around a lost colony, Carcosa's shifting world, and Arjun's obsessive search for someone important to him. At its core, though, this is still a

game about surviving impossible-looking screens full of neon death. It's a third-person action-shooter that mixes bullet hell and roguelite elements with sci-fi horror, permanent progression, and a more forgiving structure than Returnal.

STORY AND CHARACTERS

The emotional centre of Saros is Arjun Devraj, and that already gives the game a stronger dramatic anchor than many roguelites manage. Arjun is not a blank combat vessel. He is tired, angry, guilty, and caught in a loop that feels as psychological as it is physical. Rahul Kohli gives him a grounded presence, which matters because the game's world is anything but.

Arjun's search for Nitya, his missing wife, gives the story its human
