## Best Gaming PC in ₹30,000

([tinyurl.com/g89uifd](https://tinyurl.com/g89uifd))

### Processor

The Ryzen 5 3400G is a four-core, eight-thread APU that pairs a capable Zen+ CPU with Radeon RX Vega 11 integrated graphics. It will not com-

pete with a discrete card, but at Rs. 8,000 it handles older titles, esports games, and lighter fare at 720p to 1080p with playable framerates. Think CS2 on low-medium, Val-  
orant comfortably, and older GTA titles.

### Motherboard

The B450M DS3H V3 supports the AM4 socket, meaning the 3400G slots right in, and it leaves upgrade head-

room for any Ryzen 3000 or 5000 series processor down the line. Four RAM slots, an M.2 slot for the SSD, and a micro-ATX form factor that fits the Zebronics cabinet without fuss

### Memory

The Adata Premier 8GB is reliable, but budget permitting, grabbing a second stick later should be your upgrade. At 3200MHz, it is already at the sweet spot for this platform, and 8GB handles the OS alongside your games.

| Component    | Model/Specification                         | Price (₹)     |
|--------------|---------------------------------------------|---------------|
| CPU          | AMD Ryzen 5 3400G with Vega 11 iGPU         | 8,000         |
| Motherboard  | Gigabyte B450M DS3H V3 DDR4 AM4 Motherboard | 6,000         |
| RAM          | Adata Premier 8GB DDR4 3200MHz single stick | 6,000         |
| Storage      | EVM 512GB mSATA SSD EVMMS/512GB             | 7,000         |
| PSU          | Cooler Master MWE 450 Bronze V2             | 3,000         |
| Case         | ZEBRONICS ZIUM Mid-Tower Gaming Cabinet     | 1,600         |
| <b>Total</b> |                                             | <b>31,600</b> |

## Best Gaming PC in ₹75,000

### Storage

Having a terabyte of space with the EVM M.2 drive is a luxury that becomes a necessity once you want to install a few AAA titles like the upcoming GTA 6 or Call of Duty. While it uses the SATA interface, it still offers vastly superior speeds compared to old-school hard drives, ensuring your system boots in seconds.

### Graphic Card (GPU)

The INNO3D RTX 3050 remains a solid entry into the RTX ecosystem. You get access to DLSS, which is essential for boosting frame rates in demanding titles, and Ray Tracing for improved lighting effects. It handles 1080p across competitive and cinematic titles.

### Power Supply

The Cooler Master MWE 450 Bronze is the workhorse of this rig. It's a reliable 80 Plus Bronze certified PSU that provides clean, consistent power to

your components. 450W is the perfect "right-sized" capacity for this specific CPU and GPU combo, offering high efficiency without the extra cost of unneeded wattage.

| Component    | Model/Specification                           | Price (₹)     |
|--------------|-----------------------------------------------|---------------|
| CPU          | AMD Ryzen 5 7600X                             | 20,000        |
| GPU          | INNO3D NVIDIA GeForce RTX 3050 Twin X2        | 22,000        |
| Motherboard  | Gigabyte B650M H                              | 8,700         |
| RAM          | G.SKILL Ripjaws V Series 16GB (2x8GB) 3200MHz | 12,500        |
| Storage      | EVM 1TB M.2 SATA SSD EVMMS/1TB                | 10,000        |
| PSU          | Cooler Master MWE 450 Bronze V2               | 3,200         |
| Case         | ZEBRONICS ZIUM Mid-Tower Gaming Cabinet       | 1,600         |
| <b>Total</b> |                                               | <b>78,000</b> |
