

COMPUTEX 2026

LAPTOP LAUNCH

Asus unveils ProArt P16 and P14 laptops powered by Nvidia RTX Spark

A sus unveiled an entire AI-focused ecosystem at Computex 2026, headlined by the ProArt P16 and P14 laptops powered by Nvidia's new RTX Spark platform. RTX Spark pairs a Blackwell RTX GPU (6,144 CUDA cores, fifth-gen Tensor Cores) with a 20-core Grace CPU, delivering up to 1 petaflop of AI performance and 128GB unified memory to run advanced AI workflows locally. The creator laptops get Lumina Pro OLED displays with up to 1,600 nits HDR brightness, 120Hz refresh, and new Nano Black and Neo White finishes. tinyurl.com/63t83upx

Microsoft Surface Laptop Ultra launched with Nvidia RTX Spark

Microsoft announced the Surface Laptop Ultra, its first Surface built around Nvidia's RTX Spark chip. The chip combines the GPU with a 20-core Grace CPU over NVLink, supports up to 128GB unified memory, and delivers 1 petaflop of AI compute, running models up to 120 billion parameters locally. It sports a 15-inch mini-LED PixelSense Ultra touchscreen with up to 2,000 nits peak HDR brightness, the brightest ever on a Surface. tinyurl.com/2f26esdn

Intel announces Xeon 6+ processors, says AI will make CPUs important again

Intel used Computex 2026 to argue that the rise of agentic AI will return CPUs to prominence, as inference workloads demand heavy task coordination, scheduling, and memory management. Intel announced its Xeon 6+ server processors, built on its 18A process for cloud-native AI, networking, and large-scale inference. Intel stressed that CPUs are becoming the that keeps data-centre running. tinyurl.com/38d3uzz9

AI CHIPSETS

Snapdragon C, AI laptops and more unveiled ahead of Computex 2026

Q ualcomm's reveal was the Snapdragon C chipset, aimed at affordable entry-level AI laptops. AMD unveiled its Ryzen AI Max PRO 400 Series, claiming the world's first x86 client chips able to run 300-billion-parameter models with up to 192GB unified memory. Intel announced Arc G-Series processors for handhelds with XeSS 3 and ray tracing, while Acer showed the Predator Atlas 8 plus Swift Spin 14 AI and Aspire Go 15 laptops. MediaTek joined Nvidia to show the DGX Spark system. tinyurl.com/jjkczat9
