

## HP DESKJET 4388

# All-in-one printer

Capable hardware,  
fussy firmware

**T**he HP DeskJet Ink Advantage 4388 All-in-One isn't trying to be a high-volume office workhorse, nor is it built like a premium photo printer. It's meant for homes, students, hybrid workers and small offices that need an affordable colour inkjet printer with inbuilt scanning and copying features. And to keep up with the times, it's got wireless printing and an automatic document feeder. These were features, that until now, would only be present in more premium models. HP lists the printer at Rs 8,349 officially, however, you can find it for about Rs 7,299 on most major online retail stores.

### Specifications

A glance at the official specifications puts it squarely in the light-duty category, with ISO print speeds of up to 8.5 ppm in black and 5.5 ppm in colour, draft speeds of up to 20 ppm in black and 16 ppm in colour. HP has a recommended monthly page volume of

100 to 300 pages for the DeskJet 4388. Print resolution goes up to 1200 x 1200 DPI for black output, while colour print quality is rated at up to 4800 x 1200 DPI when printing from a computer on selected HP photo papers with 1200 input DPI. Like most printers today from HP, this one uses HP PCL 3 GUI, HP PCLm and URF for AirPrint, and supports manual duplex printing with driver assistance.

Connectivity options are decent with the DeskJet 4388 coming with a USB 2.0 port and built-in dual-band Wi-Fi (802.11a/b/g/n). Mobile printing support includes the HP app, Apple AirPrint, Mopria Print Service and HP Print Service Plugin for Android. The only bit missing is an Ethernet port. Adding that would have rounded out all options but plain Wi-Fi should be fine for most users.

Paper handling is modest but more than appropriate for this segment. DeskJet 4388 printer has a 60-sheet input tray and a 25-sheet output tray.

Supported media includes plain paper, photo paper, brochure paper, envelopes and other specialty inkjet papers. HP lists A4, B5, A6 and DL envelope among the supported sizes, with custom media ranging from 76 x 127 mm to 215 x 355 mm. Borderless printing is not supported, and HP recommends 75 GSM media. Most of the popular brands in the market start from 70 GSM, so you should be fine for paper.

On the scan side, the DeskJet 4388 uses a flatbed scanner and an automatic document feeder. Optical scan resolution is rated up to 1200 DPI, with supported export formats including JPEG, PNG, TIFF and PDF. HP lists the maximum flatbed scan size at 216 x 297 mm, while the ADF can scan up to 215.9 x 355.6 mm. Lastly, the ADF capacity is listed at 35 sheets.

The monthly duty cycle is up to 1,000 pages, but HP recommends a monthly page volume of 100 to 300 pages. So while you can push this to 1,000 or more, doing so is going to wear
