

MINI LED TV

Lumio Vision 9 Smart TV (EPIC2-ADSI)

Rather than stripping features to hit a lower price, the Vision 9 retains the essentials that matter. Its QD Mini LED display, 144Hz refresh rate and Google TV platform give buyers an authentic Mini LED experience at a more accessible price.

QLED TV

Xiaomi Smart TV X Pro 75 L75MB-APIIN

Few TVs make the jump to 75 inches this accessible. The Xiaomi X Pro pairs a large QLED panel with Dolby Vision, HDR10+, Filmmaker Mode and DLG 120Hz support, giving buyers an immersive home theatre experience without the usual premium.

RGB TV

Sony Bravia 7 II 55XR70M2

Rather than relying on conventional Mini LED lighting, the Bravia 7 II uses a True RGB backlight with independent control of red, green and blue LEDs. The result is more accurate colours, refined local dimming and consistently impressive picture quality powered by the XR Processor.

BUDGET 4K SMART TV

Cellecor CT-55UHD4K Pro 4K

The Cellecor CT-55UHD4K Pro delivers where it matters most for everyday entertainment. You get a premium-looking design packing 4K vibrant QLED colours, Dolby Audio, free live TV channels, and a polished Tizen OS TV experience. Together, they make it a TV that gets the essentials right at an affordable price.
