

3

Conversely, I am going to buy the stock when the RSI goes below the 30 levels and bounce back (above the 30) while forming a W type structure.

5

I am going to book profits when the RSI reaches the opposite overbought/oversold levels. 30 in the case of a bearish trade and 70 in the case of a bullish trade.

4

The stoploss will be close to the nearest price swing near the entry point.
