THE 3:00 PM NIFTY INTRADAY STRATEGY

Strategy video

The most important thing for a trader is to form strategies that capitalize on every type of market move. Among these strategies, there is one strategy that I have tested and modified to maximise returns. In this chapter, we will explore the intricacies of this strategy, shedding light on its underlying principles, rules, and history.

UNVEILING THE STRATEGY

The chapter begins by introducing the concept of the 3:00 p.m. Nifty Intraday Strategy, which focuses on capturing momentum within a short timeframe. The strategy primarily revolves around option selling and aims to exploit the maximum Theta decay by entering the market at precisely 3:00 p.m. Driven by the quest for momentum, traders employ a carefully devised set of rules to execute their trades effectively.
