

FROM THE ILLUSTRATION

You can see that TITAN stock is in an uptrend making higher lows. After a small consolidation, a Bullish Marubozu candle is formed with huge volumes giving early indication of Triangle formation.

The Bullish Marubozu candle makes a high of 1371. A consolidation is visible after closing and there is a decline in volumes. The decreasing volumes indicate that a breakout with huge volumes is likely to continue the trend.

A breakout at 1360 level with 5.497M volumes confirms the Triangle breakout, and the price continued to make higher highs.
