

- Alternatively, visit Jio's official site to scan a QR code for direct download.

2. Language & UI Personalization

- On first launch, select from eight Indian languages – Hindi, Marathi, Tamil, Gujarati, Telugu, Malayalam, Kannada, and Bengali – to localize menus and default content feeds.
- Customize your state-specific feed: tap Settings → Regional Content and choose your state to see local news and popular sites.

3. Privacy & Ad Blocking

- Enable the built-in Ad Blocker via Settings → Privacy → Ad Block to eliminate intrusive ads for a cleaner experience.
- Emoji-domain support lets you type domains using native emojis (e.g., 🇮🇳.com) for fun, secure access.

4. Dark Mode & Reading View

- Toggle Dark Mode under Display for comfortable night browsing.
- Use Reader View on article pages to strip away clutter – tap the book icon in the address bar.

5. Incognito with PIN Lock

- Activate Incognito Mode from the menu; to secure it, enable PIN Lock so each incognito session requires authentication.

Epic Privacy Browser: Desktop confidentiality

Originating in Bangalore as Hidden Reflex's Chromium fork, Epic Privacy Browser ensures every session starts as private, automatically blocking ads, trackers, fingerprinting scripts, and cryptominers.

- **Zero Data Persistence:** Exiting Epic deletes all cookies, caches, and histories – no traces remain on your PC.
- **Built-In VPN:** Epic routes traffic through its own VPN, encrypting data and hiding IP addresses from ISPs and governments.

- **One-Click Shield:** Click the Epic icon to view and toggle protections – ads, trackers, analytics, and social media buttons are blocked by default.

For privacy-conscious desktop users, Epic is a pure, always-on private browser that rivals Tor's privacy without sacrificing speed.

2) Cloud storage and file sharing

DigiBoxx: Sovereign Indian cloud

Developed in collaboration with NITI Aayog and launched December 2020, DigiBoxx pledges 100% local-server storage and database-level encryption – ensuring all data remains within India's borders.

1. Sign Up & Free Tier

- Visit digiboxx.com, click Sign Up, and register with email or mobile OTP.
- The individual free plan offers 20 GB of storage; enterprises can explore paid tiers starting at ₹99/month.

2. Upload & Organize

- On a web or desktop client, drag-and-drop files or click Upload. DigiBoxx auto-categorizes files into Documents, Images, Videos, and Others.
- Create Shared Folders by right-clicking a folder → Share → invite collaborators by email or mobile number.

3. Gmail Integration

- Install the DigiBoxx Gmail Plugin: in Gmail, click Compose, select the DigiBoxx icon, and attach large files directly from your cloud – bypass Gmail's 25 MB limit.

4. Security Controls

- Enable Two-Factor Authentication via Account Settings → Security for extra protection.
- Use Link Expiry and Password Protection on shared links to control access.

By mid-2021, DigiBoxx surpassed 1 million users, demonstrating strong demand for sovereign, secure cloud in India.
