WiFi Map	Offline Wi-Fi finder	Android, iOS	Database of millions of Wi-Fi hotspots with passwords and offline maps	Saves data abroad by locating free Wi-Fi spots even without connectivity
HappyCow	Restaurant & cafe finder	Android, iOS	Curated listings of vegetarian, vegan, and eco-friendly eateries worldwide	A hidden gem for mindful travelers or anyone seeking healthy dining options on the go

countries where Google Maps’ local transit data is unreliable or incomplete.

Moovit’s step-by-step “Live Directions” uses vibration cues and voice prompts to guide you through transfers – you can literally navigate public transport without ever looking at your screen.

9. HERE WeGo

Platforms: Android, iOS

The most reliable offline navigation app after Google Maps. Originally developed by Nokia, HERE WeGo remains one of the most dependable offline navigation apps around. You can download entire countries for voice-guided navigation, covering driving, walking, and even public transport routes.

It’s perfect for international trips where mobile data is costly or spotty. The UI is clean, the routing accurate, and traffic info (when online) is solid. Plus, it supports both car and pedestrian navigation with equal finesse.

HERE WeGo’s “Collections” feature lets you bookmark locations – hotels, restaurants, viewpoints – and sync them across devices, so your itinerary stays consistent across phone, tablet, and desktop.

10. XE Currency

Platforms: Android, iOS

Convert currencies instantly – online or offline. XE Currency is a long-standing favorite among travelers for one simple reason: it just works. You get live exchange rates for every currency on Earth, updated in real time. But what makes it a true travel essential is its offline mode – it remembers the last updated rates and continues working when you’re offline.

You can convert multiple currencies simultaneously, set alerts for rate changes, or compare costs side by side (like USD vs EUR vs INR).

XE lets you pin your frequent currencies to the top, so conversions are instant – perfect for multi-country trips.
