

In case you didn't know, Habitica has a “Party” system where your real-life progress helps defeat digital bosses – and failing your habits can cause damage to the whole team. It's a clever, peer-based motivation engine.

5. TickTick

Platforms: Android, iOS

A modern to-do list that blends tasks, habits, calendar, and Pomodoro – all in one clean UI. TickTick flies under the radar compared to Todoist or Google Tasks, but offers much more in its free tier: smart lists, calendar view, priority levels, habit

tracking, Pomodoro timer, widgets, and more. You can share task lists with collaborators, schedule recurring reminders, and even sync with external calendars. It's flexible enough for simple lists and detailed enough for GTD nerds.

TickTick's built-in Pomodoro Timer is a huge highlight for all its users, as it not only tracks your focused work sessions but also generates productivity stats like total hours worked, longest focus streak, and average task completion time.

6. Otter.ai

Platforms: Android, iOS

Real-time voice transcription that's accurate, searchable, and free. Otter is an AI-powered transcription tool that turns voice recordings into beautifully formatted, timestamped, and searchable text. Whether you're in a meeting, lecture, or interview, Otter automatically converts speech to text and organizes it into a shareable summary. It supports speaker identification, slide integration, and cloud syncing. You can record live or import audio, and the app will create an editable transcript you can highlight, comment on, or export.

It integrates with Google Meet, Zoom, and Microsoft Teams to join meetings as a “participant” and transcribe them live – essentially giving you a virtual note-taker that never misses a detail.

7. Pushbullet

Platforms: Android, iOS

Very simply put, it makes your phone and PC best friends. Pushbullet lets you mirror notifications from your phone to your desktop, send files and links instantly across devices, and even reply to texts and WhatsApp messages from your computer. It's
